II. Leads not fully developed and inconsistencies in Subject's statements:

None.

III. Promises and commitments made:

None.

IV. Interrogator's comments and conclusions:

1. Buildings included in the separate sketch are not exactly to the scale.
2. In estimating dimensions of buildings Subject used the distance between two telephone poles as standard, taking it for 40 meters.
3. The above information was stated through interrogation, toward which Subject was cooperative.
4. Subject stated that the Ch'ongjin Transformer Station is considered to be located at EB 640250.
5. Among hills at EB 700240 on the Komulsan coast there existed since the Korean War days several dozens of artillery bunker positions. During the War days, when firing at navy vessels of UN side, the artillery used to be drawn to the outside of bunker entrance and back into bunkers again by physical power, but at the present, electric devices are applied to them so that they are automatically moved.

been to Komalsan on labor mobilization. A new automobile road leading to Komalsan was built after 27 Jul 52 (the Armistice).
